HOW LONG WILL THE SAME
LANE CLOSURES BE IN EFFECT?

The EB C-470 weekend closure from Quebec to Yosemite will be in effect from Friday night (8:00 PM) to Monday morning (5:00 AM).

Comments: The concrete needs to reach a certain compressive strength and needs cure time before traffic can be allowed on the new pavement. There will be down time while the concrete is curing Sunday day/evening with little activity. Then the road needs to be patched and striped to open it up to traffic.
